Chemistry Building Renovation & Addition

Architectural Rendering
Original Chemistry Building & New Addition - The Commons

Metal Panels
Installation of the metal panels on the south side is nearly complete and moving to the west side

Exterior
Historic brick is still being re-grouted and replaced
Room 105: The last piece of drywall has been hung. The remaining portions of the wall will get sound absorbing material soon.

Level 3: More ceiling grid has been completed on level 3.

Level 2 Hallway and Water Fountain Cove: Accent tile is in the water fountain cove. The hallway floors have been ground and polished and protected by the white plastic board.

Audio Visual: TV bracket install has begun. Much more AV to come.
Site Work:
The front steps have been removed and are being replaced with a new universally accessible front entrance.

Historic Site Work:
The Mall has changed and the palm trees are much taller since the Chemistry building was completed by Sundt in 1936.
