Chemistry Building
Renovation & Addition

Update – Week of September 26th, 2022

Architectural Rendering
Original Chemistry Building & New Addition - The Commons

Metal Panels
One section remains to be completed on the west side of the addition

Exterior Historic Brick
The masons’ work platform on the hydraulic scaffolding has reached the top of the building which signals that they are near completion on restoring the bricks.
Lobby Solar Tubes:
The lobby solar tubes have arrived and are installed. They bring a lot of natural light into the space.

Window Shades:
There are three types of window shades being installed throughout the project.

Concrete Floor Grinder:
Most of the floors in the new addition are ground, polished concrete so the extensive grinding process is underway.

No photos of the final product yet because the floors are covered up and protected right away.
Site Work:
A portion of sidewalk along the Mall has been replaced and rebar cages for more concrete site work have been constructed.

Exterior Stairs:
New stairs on the south side of the Addition.

The cable railing is starting to be installed.
