West Side
Doors are installed! Plants are in the ground and last bit of decorative gravel is being spread!
So much can be said about the grand lobby because it plays an important role in tying the past (1936 Chemistry building) to the present (New Commons Building). Historic brick is complemented by the exposed steel and warm wood grains. The natural light through the solar tubes makes this entrance welcoming and cozy. Stay tuned as the ceiling is finished and the stained polished concrete floor is revealed!
Chemistry Building Renovation & Addition

Classrooms

Large Collaborative Classrooms: The Commons Building has 3 large classrooms and the renovated Chemistry Building has 4 classrooms, plus a plethora of other spaces to support faculty and collaboration in the new age of learning. Check out some of the carpet and furniture!
