

DIVISION 5 - METALS

Section 05300 - Metal Decking

Introduction

Metal decking is a straightforward structural specification with limited University requirements.

Part 1 - General

- Specify type of attachment to structure, i.e., screws or puddle welding.
- Be aware that many metal deck manufacturers do not allow attachment of suspended loads to the underside of their metal deck. Unless engineered differently, all ceiling, framing, mechanical, plumbing and electrical supports shall be attached to the structural framing members only.
- Verify that metal deck priming or galvanizing is compatible with fireproofing when applicable.

Part 2 - Products

- There are no unique University requirements.

Part 3 - Execution

- There are no unique University requirements.
