

DIVISION 5 - Metals

Section 05700 – Ornamental Metals - Skateboard Deterrents

Introduction

Destruction and degradation of architectural edges due to skateboarders, skaters and BMX bicycles is an ongoing problem at the University. Where possible, integrating deterrents into the architectural design is preferred. This can be done many different ways - with uneven edges, recesses, ground textures, railing design etc. Otherwise, specify appropriate metal skateboard deterrent systems whenever edges and surfaces create temptations. The University recognizes that not all conditions that create opportunities for skateboarders, skaters & BMX'ers can be foreseen or prevented.

Part 1 - General

- Generally, railings, concrete edges, brick edges, tile edges, concrete benches, seatwalls, and protruding ledges should be evaluated for application.

Part 2 – Products

- Metal Skateboard deterrents – past projects have utilized products from Barco Products. Similar products from other manufacturers may also be specified.
