

DIVISION 6 - WOOD AND PLASTICS

Section 06200 - Finish Carpentry

Introduction

Consideration shall be given to the use of wood base, in lieu of the usual rubber base, in high use areas where equipment might impact and damage walls. Also consider chair rails for wall protection where appropriate.

Part 1 - General

- Finish Carpentry and Interior Architectural woodwork shall be fabricated to current Standards of the American Woodworking Institute (AWI). In most circumstances the requirements of "Finish Carpentry" may be combined with Section 06402 - Architectural Woodwork rather than in a separate section.

Part 2 - Products

- All Architectural Woodwork shall be "Custom" grade (or better as may be required) according to the American Woodwork Institute (AWI) and subject to the following:
 - No particle board or particle board core plywood may be used in any part of the work.
 - Plywood shall be industrial quality.

Part 3 - Execution

- Installations shall be by skilled tradesmen. In the cases where fabricator and installer are not one and the same, product and project guarantee shall not be compromised.

End of Section 06200
