

DIVISION 10 - SPECIALTIES

Section 10293 – Bird Control

Introduction

Pigeon roosting and congregation is an ongoing problem at the University. Specify appropriate bird control systems whenever conditions are created that might enable pigeon roosting or congregation over occupied or pedestrian areas or where resultant roosting will create unsightly conditions. Areas where food service is available may need extra special attention.

Part 1 - General

- Generally, ledges, window sills, overhanging shade devices, roof peaks and edge conditions should be evaluated for application.
- For small isolated areas, parapet walls and roof edges, a stainless steel bird spike system may be sufficient.

Part 2 – Products

- For larger overhangs or window sills or where deterrence has been identified as a special requirement, a low voltage electric system such as the Avian Averting System® by Avian Flyaway, Inc is recommended. Contact information is as follows:

Avian Flyaway, Inc.
Western Regional Office
1645 W. Valencia Rd.
Suite 109-514
Tucson, AZ 85746
Phone: (520) 889-7303
Fax: (520) 889-1375
